RE: School Recordkeeper

To whom it may concern,

I would like to take this opportunity to acknowledge School Recordkeeper for exceeding our expectations in the development, implementation, and continued support of this scheduling and student management system.

When Centre for Arts and Technology initially approached School Recordkeeper about the implementation of a new scheduling and student management software, we realized that we would face a number of challenges in our transition from our previous software. School Recordkeeper was able to share ideas, recommendations, and expertise in order to make the transition smoothly in what I consider to be a superior and very professional job.

I would like to especially thank Mr. Aaron Beck for the professionalism he displayed in working with our staff to assure our complete satisfaction, as well as his continued devotion to meeting all of our needs and solving any problems in a very timely fashion. Staff find Mr. Beck easy to work with and very thorough in all of the work he's done for Centre for Arts and Technology. We have established a wonderful working relationship with Mr. Beck and look forward to continuing our business relationship with him and School Recordkeeper in the future.

Centre for Arts and Technology has enjoyed working with and would like to thank School Recordkeeper for all of the hard work and dedication. I would highly recommend School Recordkeeper to other schools and organizations looking to acquire scheduling and student management software.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. Theiss', with a horizontal line extending to the right.

Martin Theiss
President
Centre for Arts and Technology
